

PageSpeed Insights

Mobile

49 / 100 Speed

! Should Fix:

Reduce server response time

In our test, your server responded in 1 second.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking CSS resources. This causes a delay in rendering your page.

Mobile

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <https://fullzcvv.cn/css/bootstrap.css>
- <https://fullzcvv.cn/css/auth.css>
- <https://fonts.googleapis.com/css?family=Montserrat:400,700&display=swap&subset=cyrillic>
- <https://fullzcvv.cn/css/util.css>

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 487.1KiB (86% reduction).

- Compressing <https://fullzcvv.cn/images/9.jpg> could save 487.1KiB (86% reduction).

Consider Fixing:

Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://fullzcvv.cn/>
- <https://fullzcvv.cn/>
- <https://fullzcvv.cn/inc/login.php>

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 136B (13% reduction).

- Minifying <https://fullzcvv.cn/css/auth.css> could save 136B (13% reduction) after compression.

5 Passed Rules

Enable compression

You have compression enabled. Learn more about [enabling compression](#).

Leverage browser caching

You have enabled browser caching. Learn more about [browser caching recommendations](#).

Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

Minify JavaScript

Your JavaScript content is minified. Learn more about [minifying JavaScript](#).

Prioritize visible content

Mobile

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

82 / 100 User Experience

Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Consider Fixing:

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Username and 1 others render only 6 pixels tall (16 CSS pixels) final.
- REGISTER renders only 7 pixels tall (18 CSS pixels) final.

3 Passed Rules

Mobile

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

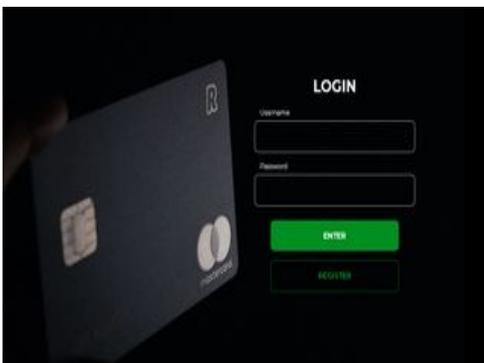

Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).

Desktop

59 / 100 Speed

! Should Fix:

Reduce server response time

In our test, your server responded in 1.00 seconds.

Desktop
